Your network is growing and many new access points, workstations, etc. are required. However, legacy equipment, along with your existing wiring infrastructure, must work with any new equipment you implement in your network. When installing multiple miniature media converters in the MiniMc family series, the IE-PowerTray/18 is the perfect solution.

The unmanaged IE-PowerTray/18, from Advantech B+B SmartWorx, allows you to easily and cost effectively connect multiple converters in one chassis, eliminating the need for individual AC power adapters. Rack mount capability allows you to install it securely.
