

# Street Surveillance

## **Application Requirements:**

With the increasing crime rate, it is vital to take security seriously nowadays. Cities around the world require technology solutions that can help law enforcement departments to deal with threats like theft, pickpockets, vandalism, assaults, and violence on the streets. Adoption of surveillance systems can help monitor and record on-goings on the street. Most importantly, they are helpful as they can keep an eye on the peoples' activities on the streets, in case any threat occurs. Recorded video footages can serve as useful pieces of evidence when crimes have been committed and law enforcement departments need clues to solve the crime.

## **Benefits:**

- Rugged and wide operating temperature design suitable for harsh outdoor environment.
- PoE ports that support mainstream IP cameras can capture street footage which is used to monitor activities and identify threats.
